

Creative Harmony

Suno's Melody

What is it ?

A team-building experience that combines the power of artificial intelligence with the magic of music to create a unique anthem for your company or a memorable jingle for your team meetings!

In this collaborative session, participants craft the lyrics and melody of a song or jingle reflecting their company's identity using ChatGPT (or Copilot, Gemini...) and Suno. «Creative Harmony» strengthens brand identity, boosts team motivation, and offers a fun introduction to AI.

Collaboration and communication will be key throughout the creative process. Teams will need to merge their talents to craft a memorable collective masterpiece!
