

Fresco of the Climate

A workshop to raise awareness of environmental issues

What is it ?

The **Climate Fresco** workshop is a fun and educational workshop with a scientific approach to make your teams aware of climate change and environmental issues.

Your employees will reflect together on our common future. Guided by our facilitator, they will be able to ask questions, get information, form their own opinion and understand the issues of climate change.

This collective workshop is a great tool for positive awareness and team building.

10 to 100
participants

2h à 3h

On-site
